The first DEKRA powered vehicle inspection station in Mexico has opened in Guadalajara. The global leader in the field will open five additional emission check stations in Guadalajara by May 2021, bringing 240 new jobs to Mexico's second largest city. The stations are a critical element of "Jalisco Respira", a state program to reduce emissions and improve air quality.

"Requiring vehicles to undergo state-of-the-art emission checks is an example of how Jalisco continues to lead by example as we protect our natural resources to secure the environmental and economic health of future generations," said Enrique Alfaro Ramírez, Governor of Jalisco. DEKRA's experience and expertise convinced Jalisco's authorities, said the Governor. "In DEKRA we have a strong partner to improve air quality in our state."

The stations will be operated by DEKRA and managed by the state's Ministry of Environment and Territory Development (SEMADET). The new DEKRA stations will offer comprehensive emission inspections for traditional and diesel fuel vehicles, including all state and municipal vehicles, as well as commercial vehicles. "We are committed to improving air quality in our communities and creating a safer world," said Bert Zoetbrood, President and Chief Regional Offer of DEKRA Americas. "We are also committed to best-in-class partnership, which allowed us to open this station five months ahead of schedule by working closely with our partners at SEMADET."

Located in central Guadalajara, the new station is the first privately-operated vehicle inspection station in the state of Jalisco. The new station's seven lanes are projected to handle 65,000 inspections in 2021 and grow to more than 100,000 per year in the future. Once open, the six DEKRA-powered stations in Guadalajara will include 42 lanes and are expected to handle a total of 600,000 inspections each year.

About DEKRA

DEKRA has been active in the field of safety for more than 90 years. Founded in 1925 in Berlin as Deutscher Kraftfahrzeug-Überwachungs-Verein e.V., it is today one of the world's leading expert organizations. DEKRA SE is a subsidiary of DEKRA e.V. and manages the Group's operating business. In 2020, DEKRA generated preliminary sales totaling 3.2 billion euros. The company currently employs more than 43,000 people in approximately 60 countries on all six continents. With qualified and independent expert services, they work for safety on the road, at work and at home. These services range from vehicle inspection and expert appraisals to claims services, industrial and building inspections, safety consultancy, testing and certification of products and systems, as well as training courses and temp work. The vision for the company's 100th birthday in 2025 is that DEKRA will be the global partner for a safe world.
